PROJECTS

Portfolio Website
Web Developer
- Developed a responsive portfolio website using HTML, CSS, and Bootstrap. Implemented interactive features with JavaScript.
- Explore more of my work and projects by visiting my portfolio.

Covid-19 Testing System
Backend Developer

Developed a comprehensive COVID-19 testing management system with a multi-user setup, including Admin, Hospitals, and Patients. The platform allows:

- **Admin Panel:** The admin can manage hospital registrations, approve or reject requests, and view all system data, including hospital and patient records.
- **Hospital Portal:** Hospitals can submit registration requests to the admin for approval. Once approved, hospitals can manage patient approvals, view patient data, and oversee the testing process.
- **Patient Profile:** Each patient has a dedicated profile where they can access their test results and manage their personal information.
- **Link:** covid testing system.

E-commerce Website
Web Developer

Designed and developed a fully functional e-commerce website with essential features for both customers and admins. Key components include:

- **Add to Cart Functionality:** Customers can browse products and add them to their shopping cart for easy checkout.
- **Search Bar**: A search functionality allows users to quickly find products based on keywords or categories.
- **Admin Panel**: The admin panel enables product management, where the admin can add, update, or delete products, and oversee inventory levels.
- **Customer Profile**: Each customer has a dedicated profile section that includes their personal information and order history. Customers can view past purchases and update their profile details as needed.
